3 x 26cm active powered woofer with dsp- crossover.
e' 350 Watt RMS. 20 – 100 Hz.
Dimensions: 300 x 1.100 x 470 (BxHxT)

ICHOS speakers need some time for burn- in to reveal the full beauty of sound. Due to the special lacquer-
treatments of our wideband- drivers the time for full burn- in takes a little longer. All speakers of the line work fine
and offer very good soundquality from about 50 hours of playtime.

From this point the Ichos speakers sound beautiful and the burn- in with consistently additional increasing
soundquality continues for a total of about 400 hours until the burn- in is fully done.

All prices are retail- prices for a pair of loudspeakers, VAT included.

Handcrafted castings are available in matt finished black (basic price), with spikes on stainless steel flat washers. High-level dipole tweeters are inserted in aluminum mono block-cases (black matt).

The usual time for production is 8 to 10 weeks, special features and finishes may extend the waiting- time to about 12 -15 weeks.

All goods are our property until the payment is completed.
The place of jurisdiction is Vienna.
